Abstract

Objective: As the world’s most populous Muslim country, Indonesia carries the responsibility to establish an Islamic healthcare system that are of superior quality. Believing that Islamic Shariah is the best system for any activity, the need to translate the system into a measurable and objective healthcare quality tools are eminent. In 2015 the Standard of Shariah Hospital Certification were published and in 2016 the National Shariah Council produced a fatwa on the implementation of Shariah Hospital. In 2017, a second version of the Standard were published to be formalized by the National Shariah Council as the awarding body. In this article, the working principles of a hospital practicing the Shariah provisions in Indonesia will be explained. Approach and Value: The concept uses the maqasidic approach in it’s structure and refers to the National Hospital Accreditation Commission format. Normative standards are conserved and Shariah values are added in all critical points. Further technical details are produced to ensure proper implementation of the standards, which are divided into Shariah management and Shariah services. Two hospitals were appointed as the pilot project and many more are awaiting it’s implementation. As a conclusion it can be said that Shariah Hospital Certification standards provides added value on top of the national hospital accreditation standards. Hospital performance are expected to improve through the implementation of Shariah Hospital Certification by means of establishing quality work culture in hospital staffs through the inculcation of shariah values.

Keywords: Shariah compliant hospital; Shariah Hospital Certification; service quality improvement; Shariah hospital standards

Introduction

Mankind are created by God to serve two functions that is to become the servant of God and the vicegerent of God on Earth. Allah ordained in the Quran, “We have not created jin and man except to worship (Allah)” in Surah Adz-Dzariyat verse 56. Thus, every activities in human life is for obedience, submission and devotion. The Islamic shariah is to facilitate the performance of ibadah in all aspects of life. It is also aimed to govern individual and societal affairs in life so as to uphold justice, mercy, wisdom and common good in those affairs, namely ibadah (worship), mu’amalah (dealings with fellow human), munakahah (marriage) and jinayah (criminality)1. God sent down the Islamic shariah as guidance for man’s life, and it is acceptable and applicable to all mankind. From the aspect of usulfiqh these

purposes are called maqasid as-shari‘ah, the purpose and objectives of the Islamic shariah. The scholars defined the purpose of shariah in five aspects: Hifzh Ad-Din (protection of religion), Hifzh An-Nafs (protection of life), Hifzh Al-‘Aql (protection of the mind), Hifzh An-Nasi( protection of progeny), and Hifzh Al-Maal (protection of wealth). These five purposes of the Islamic law in literature is called al-maqasid al-khamsah or al-maqasid ash-shari‘ah.

The purpose of the shariah is to bring goodness for mankind. MaqasidShari‘ah is a concept to understand the hikmah (the shariah values and objectives contains explicitly and implicitly in the Quran and hadith), set by God for mankind. The ultimate goal of the law is to bring maslahah or goodness and benefit for mankind both in this world (through mu‘amalah) and the hereafter (by ‘aqidah and ‘ibadah). In order to gain maslahah, man has to take everything that is beneficial to meet the needs of dharuriyat (primary needs), to complete hajiyat (secondary needs), and tahsiniyat or kamaliyat (tertiary needs). Man has also need to prevent and prohibit mudarat that is useless and harmful to life².

The awareness for the need to practice Islam in all aspects of life has brought many Muslims to realize the importance of following the shariah. This awareness has created the demand for new products and services based on shariah to be introduced into the market. Healthcare service is one of the most important area in public service. As the world’s most populous Muslim country, Indonesia carries the responsibility to establish an Islamic healthcare system that are of superior quality. From the Islamic perspective, medicine is looked into from the physical-medical and psycho-spiritual perspectives. Healthcare service in Islam is holistic, adopting the universal Islamic values.

A shariah compliant hospital is an organization which has the scope of work, policies, procedures and staffing requirements that complies to the shariah principle in totality. It does not only focus in halal products or shariah compliant services, nor provide an Islamic alternative within a conventional system. Rather, it is an all-new comprehensive system, formally recognized and certified by an independent body which has the authority to carry out the accreditation process to ensure the organization is following procedures as per shariah requirements.

Believing that Islamic Shariah is the best system for any activity, the need to translate the system into a measurable and objective healthcare quality tools are eminent. In 2015, the Islamic Health Institution Network of Indonesia or, MajelisUpayaKesehatan Islam Seluruh Indonesia (MUKISI) published a hospital service standard based on Islamic Shariah principles, which complements the National Hospital Accreditation Standards. Two hospitals were made the pilot projects. In 2016 the National Shariah Council of Indonesian Council of Ulama or Dewan Syariah Nasional MajelisUlama Indonesia (DSN-MUI) produced a fatwa on the implementation of Shariah Hospital. In 2017, a second version of the Standard were published to be formalized by the National Shariah Council as the awarding body. This effort was initiated back in 2009 during the national work meeting (RAKERNAS) of MUKISI in Batu Malang, then in SerangBanten on 2012, and in Bandung early 2015.

The process of producing the standard for service and management in shariah hospital underwent a very long and in depth study and discussions between MUKISI and DSN-MUI. The medical aspect of the standard were tackled by MUKISI and the shariah critical control points were addressed by DSN-MUI. The first version of the standard (version 1436H) were implemented to the pilot projects, and after one year, assessments were carried out and revision, improvement, enhancement and refinement were made, thereupon produce the second 1438H version of the standard.

The Awarding Body
In Indonesia, the Indonesian Council of Ulama or MajelisUlama Indonesia (MUI) is an independent body representing the Islamic scholars of Indonesia to rectify public issues pertaining to the Islamic law. MUI is an independent non-governmental organization that accommodates Islamic scholars to guide and nurture the Muslims in Indonesia. It was established in 7th Rajab 1395 Hijriyah/26th July 1975 in Jakarta, Indonesia¹. Among others, the role of MUI are:

1. To provide guidelines to Muslims in Indonesia to practice religious living in a community blessed by Allah.
2. To provide advice and fatwa on religious and societal issues to the government and the public, to promote ukhuwah Islamiyah (Islamic brotherhood) and harmony in multi-religious community in uniting the nations.
3. To become the liaison between the Islamic

In Indonesia, the Indonesian Council of Ulama or MajelisUlama Indonesia (MUI) is an independent body representing the Islamic scholars of Indonesia to rectify public issues pertaining to the Islamic law. MUI is an independent non-governmental organization that accommodates Islamic scholars to guide and nurture the Muslims in Indonesia. It was established in 7th Rajab 1395 Hijriyah/26th July 1975 in Jakarta, Indonesia¹. Among others, the role of MUI are:

1. To provide guidelines to Muslims in Indonesia to practice religious living in a community blessed by Allah.
2. To provide advice and fatwa on religious and societal issues to the government and the public, to promote ukhuwah Islamiyah (Islamic brotherhood) and harmony in multi-religious community in uniting the nations.
3. To become the liaison between the Islamic

56
scholars and the government, and the reciprocal translator for the public and the government in order to achieve national development.

4. To increase cooperation between organizations, Islamic institutions and Islamic scholars in providing guidelines for the public through consultations and reciprocal information. Some of the agencies under MUI that are related to healthcare services are:

1. Fatwa Commission or Komisi Fatwa; provide consultation, perform research and produce fatwa related to issues pertaining the Islamic law in general.

2. National Shariah Council or Dewan Syariah Nasional (DSN); provide consultation, perform research and produce fatwa on specific issues related to economy or financial activities.

3. Appraisal Body for Food, Drugs and Cosmetics or Lembaga Pemkajian Pangan Obat-obat dan Kosmetika (LPPOM); provide halal consultation and research, set the regulations and procedures for halal certification, perform halal audit and certification.

In October 2016, DSN-MUI produced fatwa No. 107/DSN-MUI/X/2016 on The Guidelines of Hospital Administration Based on Shariah Principles, which emphasized on four critical elements that must comply with the shariah principles, namely the akad (contracts), services, halal food and drugs, and financial management. The scope and points discussed in the fatwa is summarized in the diagram below. Then in March 2017, DSN-MUI together with MUKISI produced a second version of the Standard for Shariah Hospital Certification, which was validated by decree No. KEP-13/DSN-MUI/ III/2017. Together with the book of standards, three other guidelines were published i.e.: minimum shariah service standard and compulsory shariah quality indicators, shariah hospital ethical code, and physicians ethical code in shariah hospital.

**Shariah Compliant Hospital**

A shariah compliant hospital is where healthcare services provided are in accordance with the shariah principles, or simply means implementing the maqasid shariah in the hospital governance. What are the characteristics of a shariah compliant hospital, that made it different from other hospital? The following are some unique features of a shariah compliant hospital. Implementation of these components will truly reflect Islam as the comprehensive way of life.

1. Understanding the basic principles of shariah
2. Understanding the principles of halal and haram
3. Understanding the principles of mualamat
4. Implementing the concept of quality in Islam
5. Establishing the Islamic core values within the hospital organization

These component is then translated into operational management and services in the book of standard. Some of the characteristics are:

1. Shariah Supervisory Board is appointed to supervise the hospital’s operation
2. Hospital By Laws includes shariah aspects
3. The mission and vision of the hospital explicitly states Islamic objectives
4. Conducts shariah contracts (akad) with staffs, patients, logistics suppliers, financial institution and others
5. Management of human resources applies the shariah principles in its practice
6. The accounting and financial management uses shariah principles
7. Provides physical means and facilitate the performance of worship to patients, staffs and visitors
8. Provides spiritual guidance for patients and specific spiritual coaching for terminally ill patients
9. Ensures halal, hygienic and safe food and nutritional therapy
10. Guarantees the effort to cover patient’s aurah (private parts), like-gender services and prevention of ikhtilat (free mixing)
11. Infection control and its prevention uses the principle of taharah (cleanliness)
12. Conducts mandatory religious training for all staffs
13. Handles complaint, conflict or difference in opinion, in accordance with the shariah
14. Provides Islamic reproductive health service
15. The hospital pays institutional zakat (obligatory alms) which is used to help patients in need

The hospital are managed and the delivery of healthcare services are in accordance with the shariah principles and practices. It upholds the universal values of Islam, the principle of justice, peace, freedom and equality in its daily operation. From the management perspectives, Rezeki livelihood is guaranteed by God. Income cannot be defined only through financial quantification. The owner and the shareholders did not build the hospital with a profit-making paradigm only, but rather how barakah can be felt. The implementation of zakat in the financial management of the hospital has proven to increase its income. The hospital also pays extra attention towards efficiency through the implementation of several policies like Lean management, and fostering values on the concept of preventing mubazir (waste) into the mental model of the staffs.

The management sets a shariah policy to establish quality work culture in staffs because staffs are the one who carry out the services in the hospital. Policies implemented by the management are perceived by employees as an effort to establish discipline and good work commitment. A disciplined and committed employee will show good attitude and performance, perceived by patients as the recipient of service⁴.

When patient comes to the hospital, they were treated as though a guest. Hospital service system and the staffs put efforts in delivering the best service. This concept is internalized in all hospital service elements because honoring guest is part of Iman (faith). When staffs realized that the service they provide to patients is a manifestation of their faith in God, they will strive to give their best⁵. Working is an act of worship and provide the chance to perform good deeds. Every aspect of human life is part of ibadah, including work. Staffs are the hospital’s biggest and most important asset. When staffs understood that work is not a burden but an ibadah, they will put effort to perform⁶. The hospital provides an avenue for staffs to achieve Islamic fulfillment and obligation in their personal and professional lives devoid of dichotomy and dualism. It is not only a working place but also provides the means for tarbiyah (Islamic training) to the staffs.

Some of the improvement perceived by patient and visitors are from the aspect of staffs attitude, service delivery, physical facility and level of cleanliness in the hospital after the implementation of Shariah Hospital standards. Shariah values implemented such as efficiency, maintenance of patients aurah and privacy, the reminder for salah time, spiritual guidance, security assurance, halal assurance for food and medications are among others that were mentioned as a unique experience in the hospital⁷.

Healing is only from God. This concept is the very foundation of healthcare service in the hospital. When this concept is truly internalized, both patient and the healthcare provider will give their best effort in getting cure, but still aware that it is God who has the right to heal. So whatever the outcome of the effort is, it is accepted obligingly⁸. The spiritual wellbeing is regarded as important as the physical wellbeing. Being sick is an awakening moment, where one needs to take a break from worldly matters, introspect into ones life, realizing that this worldly life is just a timeline to move to another dimension; the eternal hereafter. As much as we prepared for the birth of a baby, the same preparation needs to be done in facing death.

**Shariah Hospital Certification**

In the governance of an organization, compliance has the meaning of following a specification, standard or regulations set by the authority. The specification, standard or regulations can be in the form of policy or work procedure, which when implemented correctly and well, the internal control system will run effectively and prevent the possibility of fraud. The term shariah compliant indicates compliance towards the Islamic shariah law in the governance and operation of the organization⁹.

The shariah compliance concept was developed initially in the banking industry, hence the popular term “Islamic Banking”. Eventually develop in other industry like food industry through the halal assurance system, the fashion industry, cosmetics, tourism and others. This development are based on...
high market demand of products with the shariah compliant label or recognition. Shariah compliance simply means implementing the *maqasidshariah* in the governance of a system. A standard reference and system is needed to ensure compliance. Thus, the standard of Shariah Hospital Certification is published to provide the reference in the implementation of the maqasidshariah in healthcare service system in a hospital. The standard of Shariah Hospital Certification consists of five chapters which is a breakdown of the *maqasidshariah*. Each chapter is divided into two groups; the shariah management standards and the shariah service standards. This will serve as a reference and guidelines for any hospital to be certified as Shariah Hospital in the future. The hospital then needs to translate the operational and work process in the delivery of healthcare services into policies, guidelines and standard operating procedures (SOPs).

The basic format of the standards uses the hospital accreditation standards format by the National Hospital Accreditation Commission or Komisi Akreditasi Rumah Sakit (KARS). This is to facilitate the management and hospital staffs in implementing the shariah standards in a similar mindset. The nature of the standards are also complementary to that of the KARS standards. The shariah standard only mentions aspects that contains shariah critical control points as an addition. The normative ones and the ones which do not contain shariah values within their documentation and implementation are not included into the certification standard of shariah hospital. From those standards, the elements of assessment are determined to assess the level of compliance. The element of assessment consists of documents review, patient survey and facility survey which are also in accordance with the assessment methodology by KARS hospital accreditation. Assessors conducting the survey are from DSN-MUI and MUKISI.

The certification standard of shariah hospital consists of five chapters of the maqasidshariah, and each chapters are divided into two standard groups; the shariah management standard group and shariah service standard group. The systematics of the standard of Shariah Hospital Certification are as follows:

The hospital sets operational standard to be aware of billing miscalculation.</td>
</tr>
</tbody>
</table>
From all five chapters in the standard, participating hospital are required to pass over 80% of chapter 1 as a mandatory passing requirement. An obligatory pre requisite for the Shariah Hospital Certification assessment is that the hospital must pass the hospital accreditation by KARS. This is made compulsory for shariah compliant certified hospital to be of superior quality and to ensure patient safety.

In general, the Shariah Hospital Certification standard combines the principles in hospital accreditation which are; the concept of service quality, quality assurance, quality improvement, and value based medicine, with the shariah principles namely the maqasidshariah, halal assurance, Islamic branding and shariah compliance. The certification provides added value to the hospital. In the conventional healthcare services, value are perceived by monetary unit. But in Islam, the longevity of value extends beyond this wordly life.

**Implementation of Shariah Hospital Certification Standards**

In 2015, two hospitals were appointed the pilot projects using the version 1436H standards. Those two hospitals are Sultan Agung Islamic Hospital in Semarang and NurHidayah Hospital in Yogyakarta. Sultan Agung Islamic Hospital is a class B regional referral and teaching hospital, whereas NurHidayah Hospital is a class D district hospital. Both hospitals achieved the “Mumtaz” predicate on their certification assessments. “Mumtaz” is awarded with five crescents, “Jayyidjiddan” presented with four crescents and “Jayyid” is given three crescents. The reason behind the appointment is to prove that the Shariah Hospital Certification is relevant and implementable to both big and small hospital, to both complex and simple work processes. Recently in June 2017, a formal assessment survey were conducted by DSN-MUI and MUKISI to both hospital, using the latest version 1438H standard. The survey results were brought to a panel meeting by the DSN-MUI to be further evaluated to determine the predicate of the certification. Both RSI Sultan Agung and RS NurHidayah passed the assessment and received the certification in August and September 2017 respectively. Many hospitals have signed up to wait for their turn to be assessed as Shariah Hospital.

The milestone achieved on this journey is impressive. It took six years from 2009 to 2015, to actually materialize the standards for shariah hospital from what at first seemed to be an impossible notion. Then, within two years of the formulation of the standards, through rounds after rounds of studies, meetings and discussions between MUKISI and DSN-MUI, the fatwa for the implementation of shariah hospital was produced, marking the historical moment for Islamic healthcare services in Indonesia. The standards are now officially owned by DSN-MUI as the awarding body. In a few years, the target is to get the recognition and endorsement for the standard from the the Ministry of Religion and the Ministry of Health.

**Conclusions**

1. The journey to produce the Shariah Hospital Certification standards went through long, rigorous and in depth study by MUKISI and DSN-MUI, as a reference for shariah compliant hospital management and services.
2. The Shariah Hospital Certification standards provides added value on top of the national hospital accreditation standards.
3. Hospital performance are expected to improve through the implementation of Shariah Hospital Certification by means of establishing quality work culture in hospital staffs through the inculcation of shariah values.
